## CAREER GOALS

I aim to apply my technical skills, improve my abilities, and contribute to meaningful projects at a reputable IT company. My long-term goal is to become a full-stack developer, continuously learning and adapting to emerging technologies.

## PROJECTS

### ■ HeavenGive

- Developed a platform where individuals in need can request donations, and donors can fulfill these requests.
- Implemented request verification by an admin to ensure legitimacy and transparency.
- Built using PHP during my Diploma in Engineering.

### ■ LifeDrop

- Created a system for patients to request specific blood types and for donors to fulfill these requests if available.
- Included admin management of requests to maintain an organized and efficient process.
- Developed using PHP, highlighting my ability to manage real-world health-related applications.

## TECHNICAL SKILLS

- HTML
- CSS
- C
- JAVASCRIPT
- NEXTJS
- TAILWINDCSS

## EDUCATION

**2019 - 2022**
